BLOODSHOT BROADHEADS - TEXT FOR ARTICLES

Low profile design with 2.25" of cutting surface = the industry's most lethal fixed blade broadhead!

120 WORD DESCRIPTION

BloodShot is the first broadhead to utilize a massive equal blade system that delivers true cut-on-contact and lethal impact with every strike. Engineered with 100% solid steel and razor sharp blades with a .040" thickness, BloodShot Broadheads don't just hit your targets - they devastate them.

What makes BloodShot so destructive is our Quadra-Blade design with four equal blade points and windows. This innovative blade configuration creates pinpoint aerodynamics with unmatched flight and balance. It cuts more on impact for increased entry damage and with all blades being equal size, the combined cutting surface is 2.25"!

BloodShot Broadheads also include our patent pending Blade-Overlock Technology, which makes our blades so solid that we guarantee you will never lose a blade!

40 WORD DESCRIPTION

BloodShot Broadheads have a massive equal blade system that delivers true cut-on-contact with every strike. BloodShot Broadheads don't just hit your targets - they devastate them with a combined cutting surface is 2.25"!. Blade-Overlock Technology guarantees you will never lose a blade!

FEATURES

- 100% solid steel construction with replaceable blades
- Engineered for maximum speed and lethal impact
- Cut-on-contact tip with 2.25" of combined cutting surface
- Two main-blade design with massive .040" blade thickness
- No little bleeder blades
- Blade-Overlock™ Technology - guaranteed to never lose a blade
- Quadra-Blade™ design with four equal blade points and four equal windows gives BloodShot unmatched aerodynamics
- Pinpoint accuracy at any speed
